VitaCharge® with the Amaferm® advantage

MORE Appetite

PIG PROTOCOL

RECEIVING PERIOD

Administer 10 mL of Vita Charge® paste to pigs before hauling to ensure appetite will stay consistent upon arrival. As soon as pigs arrive at their new home, administer 10 mL of Vita Charge paste. Continue to administer Vita Charge paste daily until appetite becomes steady. Then, slowly introduce Sure Champ® Pig pellets or meal.

THREE DAYS BEFORE A SHOW

For the three consecutive days before the show, give a 10 mL Vita Charge paste dose twice a day. If you are using a medicator, you can run Vita Charge Liquid Boost through your medicator. See Liquid Boost label for dosage based on weight.

AT THE SHOW

As soon as pigs are unloaded off the trailer, you are going to want to give a dose of Vita Charge. Depending on your administration preference, you can give Vita Charge Paste or Liquid Boost.

EXTRA INSURANCE POLICY

If you are concerned about heat stress or you are beginning to push your pigs, give 10 mL of Vita Charge paste once a day until appetite improves or stressful situation is over.

GETTING PIG BACK ON FEED

If you have a pig that has completely gone off feed, give two 10 mL doses of Vita Charge paste daily until appetite has returned.

FARROWING CRATE

Give a daily dose of 10 mL of Vita Charge paste when gilts are in the crate. Once they farrow, continue daily doses or consider adding Sure Champ Pig to your sow ration.

WEANING

To ensure that your newly weaned pigs stay on feed and water, administer Vita Charge Liquid Boost through a medicator. See Liquid Boost label for dosage based on weight.

Sure Champ VitaFerm®

Remember that all Vita Charge products are designed to work with Sure Champ. Using these products in conjunction will help create maximum results.
